CentinelSuite presentation

CentinelXPro – PSIM / Multi-NVR hypervisor

CentinelXPro pools and mutualize all of your security systems in an unique interface: CCTV, Access control, Intrusion, Intercom... in SaaS application, dedicated or virtualized. Our software adjusts itself and integrate all of your security systems' further evolution.

- » CCTV
- » ACS Access Control System
- » IDS Intrusion Detection System
- » Alarm, Intercom
- » Supervision, Network, Redundancy
- » Events automation
- » Multi-Hardware, Multi-Databases

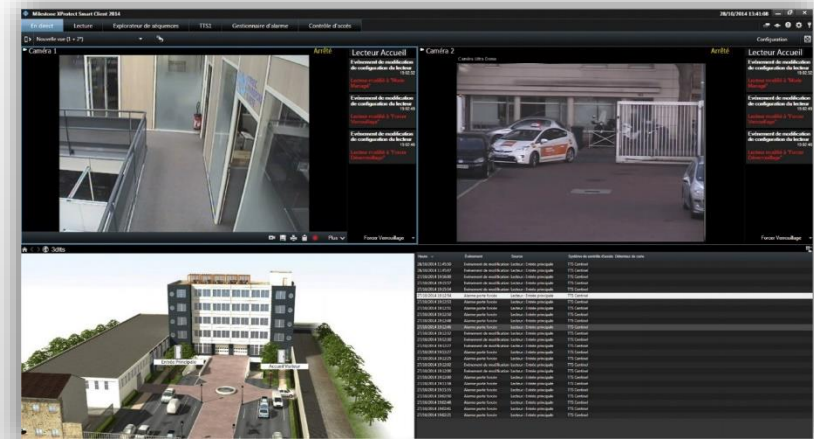

CentinelAccess – Anti-intrusion and Access control management system

CentinelAccess is an Intrusion detection and Access control dedicated management system. With native functional automation, it allows an Access control and Intrusion / CCTV convergence in a unique interface. CentinelAccess is an open platform system provided with a Milestone integrated plug-in allowing all events supervision.

- » Multi-Hardware, Multi-Sites, Multi-Companies management
- » Alarm and Anti-intrusion management
- » Biometry management
- » Crisis scenarios
- » Graphic supervisor
- » Milestone integrated plug-in

[Security systems pooling](#)

CentinelTraffic – PSIM / Traffic dedicated hypervisor

CentinelTraffic is a security hypervisor dedicated to the monitoring of road infrastructure. Allowing a wide range of events, it especially suits road traffic monitoring in need of adapted solution for road infrastructure remote management. CentinelTraffic collects and provides reliable road traffic data (statistics, real time planning, user information).

- » Vehicle presence detection
- » AID Automatic Incident Detection
- » Smoke extraction and ventilation
- » Videowall
- » Traffic data collection
- » LPR License Plate Recognition
- » Two levels redundancy (server PC then client PC)

CentinelWall – Videowall system

CentinelWall is a control center dedicated videowall system. It allows use of digital video surveillance systems with IP-based network architecture. CentinelWall has a fully configurable graphic interface which can be managed from CentinelXPro PSIM.

- » ONVIF standard and Multi-manufacturer workflow
- » Alarm cycles and scenarios management Pilotage par pupitre via IHM
- » Up to 16 streams per Wall instance
- » Configurable position and design of windows
- » Stand-alone equipment or video supervisor management (CentinelXPro or third MMI)
